**Recommended Security Checklists**

In lieu of Collegiate or Departmental-level information security checklists that have been developed by the appropriate Collegiate or Departmental Chair, Director, or Manager to meet the specific College or Department needs, UNM IT recommends the following documents and checklists be referred to and used if/when questions of configuration arise:

---

1 This list of security checklists was developed in part to address; however, no single security checklist (or series of checklists) will ever be sufficient to meet the need of each and every college or administrative IT environment given the unique nature of IT, in general, and the specific decentralized implementation and administration of IT here at the University of New Mexico.
